

SANI Service-Boxes

SANI Service-Camps

STATE-OF-THE-ART TECHNOLOGY AND ACCESSORIES FOR OPTIMUM CONSUMPTION AND OPERATIONAL RELIABILITY

Product information

With the SANI Service-Boxes we provide guarantee infrastructure in which the camps have a comprehensive supply for fresh water, waste water and electricity.

SANI provides all the technology as well as all consumables such as toilet paper and cleaning agents.

SANI service boxes:

Vacuum-Box	Wardrobe-Box
Freshwater-Box	Cleaning-/Material-Box
Wastewater-Box	Spare Parts-/Electricity-Box
Hot Water-/Shower-Box	

Consumption and resulting waste water can be recorded and analyzed in real time by measuring drinking water input and waste water output quantities in connection with telematics remote monitoring, including fault messages to the technician.

Failures due to external and internal influences can be reduced to a minimum. In conjunction with a SANI team on-site, SANI guarantees 98% operational reliability for the entire event.

SANI Service-Boxes

SANI Service-Camps

Vacuum-Box

Dimensions:	1,600 mm x 2,445 mm x 2,200 mm (length/height/depth)
Connections:	63A CEE power connection 4x 16A CEE power output 3x 3" Kamlok wastewater connection 1x Storz-C drinking water inlet 1x Storz-C drinking water outlet 4x ¾" GEKA drinking water outlet
Weight:	2,250 kg (empty)
Power consumption:	from 15 to 32 KW, depending on the quantity of modules and decrease in performance
Equipment:	The Service Box provides the vacuum supply for up to 120 spaces and performs the wastewater drainage at a distance of up to 2 km (depending on the elevation profile). In conjunction with telematics remote monitoring, including fault messages to the fitter/ technician, the drinking water input measurement and the wastewater output measurement take care of recording and analysis in real time.

Freshwater-Box

Dimensions:	1,600 mm x 2,445 mm x 2,200 mm (length/height/depth)
Weight:	1,450 kg
Equipment:	The Freshwater-Box contains all the hoses and connections required for providing the SANI Service-Camps with fresh water and drinking water.

Wastewater-Box

Dimensions:	1,600 mm x 2,445 mm x 2,200 mm (length/height/depth)
Weight:	1,500 kg
Equipment:	The Wastewater-Box contains all the pipes, vacuum hoses and accessories required for the wastewater connection.

Hot Water/Shower-Box

Dimensions:	1,600 mm x 2,445 mm x 2,200 mm (length/height/depth)
Weight:	1,450 kg
Equipment:	This Service-Box consists of hot water hoses for supplying and connecting the shower modules.

SANI Service-Boxes

SANI Service-Camps

Wardrobe-Box

Dimensions: 1,600 mm x 2,445 mm x 2,200 mm (length/height/depth)

Weight: 1,250 kg

Equipment: The Wardrobe-Box contains eight wardrobes, each with five spaces.

Cleaning-/Material-Box

Dimensions: 1,600 mm x 2,445 mm x 2,200 mm (length/height/depth)

Connections: ¾" Geka freshwater connection
230 V protective contactor (input)

Weight: 1,500 kg

Power consumption: 2 kW

Equipment: This Service-Box consists of the necessary consumables for initially stocking the SANI Service-Camps as well as a basic stock of cleaning material, mops, brooms, hygiene material and a portable high-pressure cleaner with a washing and foam lance plus a 25 m hose for cleaning the SANI Service-Camps.

Spare Parts-/Electricity-Box

Dimensions: 1,600 mm x 2,445 mm x 2,200 mm (length/height/depth)

Connections: ¾" Geka freshwater connection
230 V protective contactor (input)

Weight: 1,500 kg

Power consumption: 2 kW

Equipment: This Service-Box consists of the necessary cable material to supply the modules via the 16A CEE power supply and the Vacuum-Box as well as spare parts components for increased reliability during operations.
