## Sanitary solutions

HANDICAP ACCESSIBLE

### Product information

Whether indoors or outdoors, for a festival, trade fair or company event: The vacuum handicap explorer provides complete handicapped accessibility at every event.

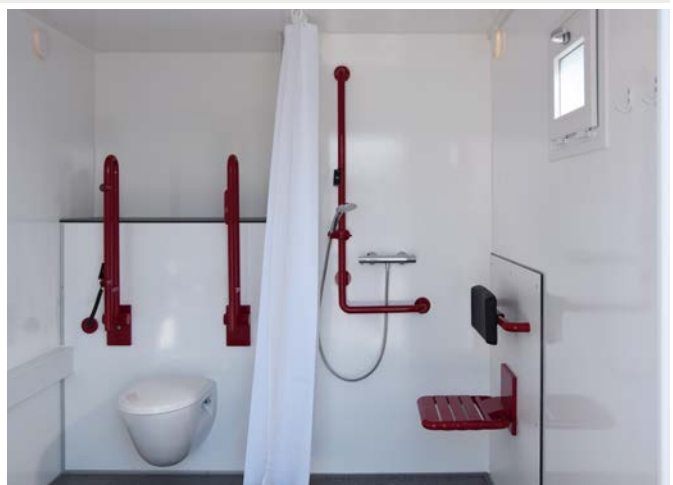

This module is equipped with 100% vacuum technology and allows you water savings of up to 90%.

A ramp, a shower at ground level, a ceramic toilet with handles and heating provide a complete service for your handicapped visitors on a non-slip, polished stainless steel floor.

Regular cleaning during the event is particularly effective thanks to the high-quality and insensitive materials.

If desired, the modules can be laminated in your brand design.
