

Vacuum Urinal-Explorer

Sanitary solutions

FOR NUMBER ONES

Product information

Whether for a festival, concert, folk festival or company event: the vacuum urinal explorer can be perfectly integrated into any event, particularly in the outdoor sector.

This module is equipped with 100% vacuum technology and is therefore particularly ecologically and economically efficient. Thanks to the vacuum technology, the urinal explorer even gets by without using any water whatsoever.

Partitions between the ten urinals provide sufficient privacy. LED ambience lighting creates the

right atmosphere at every event.

Regular cleaning during the event is particularly effective thanks to the high-quality and insensitive materials.

If desired, the modules can be laminated in your brand design.
