

Vacuum Wash-Explorer

Sanitary solutions

SMALL DETAILS,
GREAT COMFORT

Product information

Whether for a festival, concert, folk festival or company event: the vacuum wash explorer can be perfectly integrated into any event, particularly in the outdoor sector.

This module is equipped with 100% vacuum technology and is therefore particularly ecologically and economically efficient. For you, this means water savings of around 90%.

The wash explorer has a high-quality water-saving tap with eight sinks and two 220V (protective contact) sockets. The surfaces are not sensitive to

moisture, which means any cleaning agent can be used. Different lighting, e.g. different colors of background LEDs can be chosen for the mirrors.

If desired, the modules can be laminated in your brand design.
